# Get Your Certificates in Order.

Manjot Singh

Problem Statement

Nowadays self learning is the key and most of us learn so many things outside the school and college. if there is a platform which can give credibility for what we learnt by our self , from YouTube ,from a book, a blog that can revolutionise the whole structure of education and everyone will be able to make themselves a lifelong learner . This will enable more hustlers to come out and get credibility for their skills.

A platform to verify learning credentials from any website, video, video course or book to get certified and maintain them.

Problems With Current System

NO Way to credibility to Your Skiles

Platform like Udemy do not test there user's Skill

No easy way to get Certificate

No Platform To List Different Certificates form other location.

No easy way to give out certificate

No way for content creator to make quiz to verify there audience's Knowledge

Objectives

To Create A Platform

- To verify learning credentials from any website, video, video course or book to get certified and maintain them.

- To List Different certificates from different platforms and physical certificates

- To Enable content creators to create and conduct test. And also to issue certificates to examines

- To Create profile (like Resume/Portfolio page) for Users to Share

- To Provide a NFT to each user profile.

- And many more.

Pproposed Technologies to be used

- **Django(Python) for BackEnd.**

- **HTML/CSS Or Flutter for Front end (web/app.**

- **Blockchain to Create a permanent record of Certificate ensued.**

- **Use any one or some blockchain system from Nervous, Elastic, Arcana or any other to work as crypto/ blockchain part**

Use of Technologies may change or can be adapted as per requirement.

Thank you
